

Kevin Méndez

Full-stack developer in El Salvador, building for the web.

Open to work · Remote across LatAm, or relocation

kevinmendez0530@gmail.com +503 6005 3456

PROFILE

Full-stack developer in El Salvador. Around six years building with Vue and four with Laravel.

I ship complete platforms end to end: backend, frontend, mobile and cloud. One of them began as a personal project and was sold to a Salvadoran company, where I was the only engineer on it.

Right now I am building GPS fleet tracking, already in production with real customers.

SKILLS

Astro, Javascript, Typescript, Tailwind, Vue, Nuxt, Laravel, PHP, Nodejs, PostgreSQL

EXPERIENCE

Rutely.biz · proprietary

Nov 2025 - Now

Founder and only engineer

Rutely.biz is a SaaS platform for vehicle fleet management.

Applications built:

- Admin dashboard
- Driver dashboard
- Android app
- Website
- Cloud infrastructure on DigitalOcean

teip Holdings Inc. · Full time

Jan 2021 - Aug 2026

Frontend Engineer

At teip (now Bizz), I maintained and added new features to existing dashboards built with Vue 2, while also creating additional websites in Nuxt. I developed and implemented a Design System, and updated dashboards to Vue 3 following this system.

The applications include:

- Admin dashboard
- Biz dashboard
- Landing page
- Customer site
- Commerce site
- Marketing emails with MJML

Ordely.biz · proprietary

Aug 2022 - Oct 2025

Founder and only engineer

Ordely is a POS system that enables order taking. With Ordely, you can receive orders from multiple sources:

- Dashboard
- Digital menu

Comunidad de Dios · freelance

Jul 2024 - Nov 2024

Full stack engineer

Developed a web application with Laravel on the backend and Vue 3.0 on the frontend, built as a monolith, and a landing page.

teip Holdings Inc. · Part-time

Dec 2018 - Jan 2021

Frontend Development

At teip, I created multiple applications: two dashboards with Vue 2, and three websites in Nuxt.

The dashboards are SPAs, and the websites are SSG. The applications were:

- Admin dashboard
- Biz dashboard
- Landing page

- Customer site
- Commerce site

Binomiosolutions · Part-time

Jan 2019 - Jan 2020

Frontend engineer

Developed a web application with Laravel on the backend and Vue 2.0 on the frontend, built as a monolith

PROJECTS

Rutely

Nov 2025 - Now

SaaS platform for vehicle fleet management, covering an admin dashboard, a driver dashboard, an Android app and the public website

In production, with real customers

<https://rutely.biz>

Glue - The First Design System in El Salvador

Feb 2023 - Aug 2026

El Salvador's first Design System that integrates Figma and Node.js to generate standardized Vue.js components and design tokens, ensuring consistency across digital products.

Powers dashboards used by hundreds of merchants

Landing page of the Comunidad de Dios

Jul 2024 - Nov 2024

Modern landing page built with Astro and TailwindCSS, featuring responsive design and server-side data fetching capabilities

Live since September 2024

<https://cddios.com>

Dashboard of the Comunidad de Dios

Jul 2024 - Nov 2024

Monolithic dashboard application built with Laravel and Vue.js, providing API services for both the administrative interface and public website

Internal tool for a 4-person church staff

Vue calendar for vue 3

Aug 2024 - Mar 2026

Open-source calendar component for Vue 3, built with TypeScript and TailwindCSS, featuring dark/light modes and responsive design

Zero dependencies
